JavaScript, TypeScript, React, Vue, React-Native, Electron, GraphQL

Awards

NVidia Inception Program
NVidia
2025
🔗 Link to website

Architected and led development of a comprehensive full-stack risk management platform. The platform's technical excellence and innovative risk analysis approach directly contributed to Penrove's acceptance into the **Nvidia Inception program**, validating its market potential in the fintech ecosystem.

Digital Communication
Collision Awards
2025
🔗 Link to award

Led engineering development for Capstan Therapeutics' award-winning website as Engineering Manager at STRUCK agency, contributing to the project's recognition as a **Silver Winner** at the 2025 Collision Awards in the Digital Communication - Pharmaceutical category.

Digital Communication
Collision Awards
2024
🔗 Link to award

Lead developer for the award-winning Chia.com brand website and animation as part of STRUCK agency's team, earning Gold Winner recognition at the 2024 Collision Awards in the Marketing & Communications

About Me

Versatile and seasoned software developer with 10+ years of experience across front-end and back-end development, specializing in JavaScript and frameworks like React, Vue, Angular, Node.js, Express, NestJS, and GraphQL. Known for blending strong engineering with a design-oriented mindset, I craft intuitive user interfaces and dynamic animations using tools like GSAP, Lottie, and Motion. Bilingual in English and Spanish, I thrive in cross-functional, multicultural teams.

Experience

Sitel — 2009 - 2014
Customer Service Rep — Nicaragua
🔗 https://www.foundever.com

Started working at Sitel (now Foundever) as a Customer Service Representative for the CapitalOne campaign, handling high-volume inbound calls and providing support for credit accounts with professionalism and empathy. Promoted to Escalations Representative, where I managed supervisor-level calls, conducted account investigations, and resolved complex customer issues. Gained strong skills in conflict resolution, CRM systems, and effective communication under pressure.

Digital Media Construction — 2015-2017
Designer → Web Developer — Nicaragua
🔗 https://digitalmediaconstruction.com/

Started at Digital Media Construction as a Designer, creating layouts and print-ready pages for a nationally distributed golf magazine. Later transitioned into a Web Developer role, building interactive HTML5 and WordPress sites focused on user engagement. Leveraged JavaScript and advanced CSS animations to craft dynamic interfaces, while honing skills in responsive design, cross-browser compatibility, and client-specific customization.

Top Floor Marketing — 2017 - 2021
Motion Designer → Development Department Director — Nicaragua
🔗 https://topfloormarketing.net/

- **Motion Designer**: Created compelling print and digital media assets for diverse client portfolios while designing intuitive UI/UX interfaces for web applications, developing proficiency in design software and user experience principles.
- **Multimedia Director**: Led cross-functional multimedia teams and coordinated department operations, honing project management skills and strategic planning capabilities while maintaining creative oversight.
- **Sr. Software Developer**: Architected and developed scalable web solutions for international clients using modern frameworks, gaining expertise in full-stack development, cross-cultural project delivery, and enterprise-level applications.
- **Development Department Director**: Spearheaded all development operations, managed technical teams, established coding standards and workflows, while driving departmental growth and ensuring high-quality deliverables across multiple concurrent projects.

Nicasource - Struck — 2021 - 2025
Front-end Developer → Engineering Manager — Nicaragua - Remote
🔗 https://nicasource.com/

Worked for the NicaSource team as staff augmentation, assigned to one of their key clients: STRUCK, a design and development agency based in Salt Lake City, Utah.

- **Front-end Developer**: Developed responsive, interactive user interfaces for complex web applications using modern JavaScript frameworks, focusing on performance optimization, accessibility standards, and seamless user experiences across multiple browser environments.
- **Team Lead**: Coordinated cross-functional full-stack development teams in building diverse application portfolios, implementing agile methodologies, code review processes, and mentoring junior developers while maintaining hands-on development responsibilities.
- **Engineering Manager**: Managed multiple development teams simultaneously, serving as primary liaison between technical teams and C-level stakeholders, overseeing complete project lifecycles from requirements gathering through deployment, while ensuring delivery timelines and quality standards were consistently met.
